Educational Assessment Unit
Annual Examinations for Secondary Schools 2010

FORM 1  GRAPHICAL COMMUNICATION  TIME: 2 hours

Name: _________________________________  Class: ________________

Instructions

- Write your name and class on all sheets.
- Attempt ALL questions.
- Answer all questions accurately, using instruments, unless otherwise stated.
- All construction lines MUST be shown.
- Drawing aids may be used.
- All dimensions are in millimetres.
- Estimate any missing dimension.
- Marks will be awarded for accuracy, clarity and construction.

Mark
1. In the title (name) block provided on the starter sheet, print in freehand simple block letters:
   (a) Your surname and name.
   (b) Your class.
   (c) Date.
   (d) As a title write down the name ‘KITCHEN CHAIR’.
   
   10 marks

2. Two different triangles and a regular pentagon are shown.
   (a) Using the start lines given on the starter sheet, construct one triangle on line A B and
       the other triangle on line C D.
       
       8 marks
   (b) Use E F as a base line and construct the regular pentagon using any geometrical
       method.
       
       8 marks
   
   Total: 16 marks

3. The drawing below shows a seaside scene. Complete a similar drawing given on the
   starter sheet by constructing the four sun rays SA, SB, SC, and SD according to the given
   angles.
   Note: all angles must be constructed using the compass. Start by drawing line SC 90º.
   
   14 marks
4. The pictorial view of a kitchen chair is shown. Using the given start lines, draw an isometric projection of the chair, putting X as the lowest corner. Note: The given drawing is not drawn to scale.

18 marks

5. (a) Construct a regular octagon with all corners touching the inside of a circle of 80mm diameter. Use the given centre lines on the starter sheet to draw the circle.

6 marks

(b) Construct a regular octagon in a square of 80mm side. Use the set-squares and the given start lines to draw the square.

10 marks

Total: 16 marks
6. The drawing below shows a ‘Sports Club Mascot’ which consists of six parts. Give the proper name of each of the following parts: line A, the curved line B, and the shaded areas C, D, E and F. Use the table provided on the starter sheet to print down your answers. Note that X, Y and Z are centres of circles.

14 marks

7. The drawing below shows one of the walls of a castle. The upper part of the wall is made up of five parts of equal width. Using the given start lines on the starter sheet, draw the wall to the given size. The five equal parts at the top should be divided by construction (using set-squares).
Note: The drawing below is not to scale.
