INSTRUCTIONS TO CANDIDATES

• Answer ALL questions.

• This paper carries a total of 25 marks.

• Calculators and protractors are NOT ALLOWED.
1. Complete the following by choosing a number from the circle.

   a) \[ \square + \boxed{-8} = \boxed{-6} \]

   b) \[ \boxed{6} \times \boxed{-2} = \square \]

   c) \[ \boxed{12} \div \square = \boxed{-4} \]

   (3 marks)

2. Complete the following:

   a) \[ 3 \times 0.001 = \square \]

   b) \[ 4.2 \times 100 = \square \]

   c) \[ \square \div 10 = 56 \]

   (3 marks)

3. a) Write all the **factors of 24**. \(\square, \square, \square, \square, \square, \square, \square, \square\)

   b) Write all the **factors of 30**. \(\square, \square, \square, \square, \square, \square, \square, \square\)

   c) Write the common factors of 24 and 30. \(\square, \square, \square, \square\)

   (3 marks)

4. a) Find the value of \(8a + 2b\), when \(a = 3\) and \(b = -2\).

   Ans. \(\square\)

   b) Expand \(6(3 - 2y)\).

   Ans. \(\square\)

   (3 marks)
5. The diagram shows a parallelogram ABCD and a triangle ADE.

a) Find the area of triangle ADE.
   \[ \text{Ans. } \underline{\phantom{100}} \text{ cm}^2 \]

b) Find the area of parallelogram ABCD.
   \[ \text{Ans. } \underline{\phantom{100}} \text{ cm}^2 \]

6. Five athletes took part in a long jump competition. The results obtained were as follows:

<table>
<thead>
<tr>
<th>NAME</th>
<th>DISTANCE in metres</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attard Martina</td>
<td>4.97</td>
</tr>
<tr>
<td>Darmanin Elaine</td>
<td>5.53</td>
</tr>
<tr>
<td>Gatt Janet</td>
<td>5.32</td>
</tr>
<tr>
<td>Izzo Petra</td>
<td>4.85</td>
</tr>
<tr>
<td>White Nicole</td>
<td>5.07</td>
</tr>
</tbody>
</table>

a) Who jumped the longest distance?  
   \[ \text{Ans. } \underline{\phantom{100}} \]

b) What is the median distance?  
   \[ \text{Ans. } \underline{\phantom{100}} \]

c) What is the range?  
   \[ \text{Ans. } \underline{\phantom{100}} \] (3 marks)

7. a) Which of these fractions is less than \( \frac{1}{2} \)?
    \[
    \begin{array}{cccc}
    16 & 23 & 40 & 60 \\
    28 & 15 & 88 & 72 \\
    \end{array}
    \]
   \[ \text{Ans. } \underline{\phantom{100}} \]

b) Philip had 96 days of summer holidays.
   He spent \( \frac{3}{8} \) of his summer holidays in Italy.
   How many days did he spend in Italy?
   \[ \text{Ans. } \underline{\phantom{100}} \text{ days} \] (2 marks)
8. A chocolate box has the shape of a cuboid. 
   a) Calculate the volume of the chocolate box. 

   Ans. __________ cm³.

   b) The chocolates inside the box weigh 300 g. One chocolate weighs 15 g. 
   How many chocolates are there inside the box? 

   Ans. ______ chocolates (2 marks)

9. A bag contains 2 red buttons, 3 yellow buttons and 4 green buttons. 
   Jake picks a button from the bag. 
   What is the probability that the button is red? 

   Ans. _________ (1 mark)

10. Ms Tonna uses a spreadsheet to keep a record of the number of students attending the 
    Computer, Drama and Sports Clubs on Monday and Tuesday.

    |   | A             | B     | C       | D       |
    |---|---------------|-------|---------|---------|
    | 1 |               |       |         |         |
    | 2 | Computer Club | 29    | 25      | 54      |
    | 3 | Drama Club    | 27    | 34      |         |
    | 4 | Sports Club   |       | 58      | 104     |
    | 5 | Day Total     |       |         |         |

    a) On the spreadsheet, fill in cells D3 and B4.

    b) Ms Tonna wants to know the total number of students attending a club on Tuesday. 
    Which one of the following formulae should she type in cell C5? 

    =C2*C4  =SUM(C2:C4)  =C2+C4

    Ans. ________________ (3 marks)
CALCULATORS ARE ALLOWED BUT ALL NECESSARY WORKING MUST BE SHOWN.

ANSWER ALL QUESTIONS.

1. Evaluate:

   a) \(7.5^2 + 14.45 = \) Ans. _________

   b) \(\frac{\sqrt{47.61}}{4.6} = \) Ans. _________

   (4 marks)
2. Match each quadrilateral with its description.

2. Match each quadrilateral with its description.

- **Rectangle**
- **Rhombus**
- **Trapezium**

a) (i) This shape has only one pair of parallel sides. ________________

(ii) This shape has four equal sides and the opposite sides are parallel. ________________

(iii) This shape has four right angles. ________________

b) (i) The rectangle has rotational symmetry of order _______.

(ii) The rhombus has _______ lines of reflective symmetry. ________________ (4 marks)

3. Noel uses LOGO to draw this diagram.

3. Noel uses LOGO to draw this diagram.

a) Fill in the missing commands in his LOGO program.

```
PD FD 100 BK 40 RT ____ FD 60 ____ 90 FD ____ PU HOME
```

b) Noel wants to draw a rectangle round his diagram. Suggest a length and a breadth, in turtle steps, that Noel should use for this rectangle.

**Length:** __________ turtle steps.

**Breadth:** __________ turtle steps. (5 marks)
4. All the sides of the quadrilateral are measured in centimetres.

\[4x + 5 + x + 2 + 5x - 2 + x + 2\]

a) Write an expression, in \(x\), for the perimeter of this shape. Simplify the expression.

b) The perimeter of the shape is 40 cm. Write an equation for the perimeter.

c) Solve the equation.

\[x = \ldots\]

(5 marks)
5. Rachel bought five bottles of lemonade and a packet of crisps. 
One bottle of lemonade costs \( x \) cent and 
a packet of crisps costs 80 cent. 

Which one of the following expressions represents the total cost of 
five bottles of lemonade and a packet of crisps? 
(Hint: Remove the brackets first) 

\[
\begin{align*}
5(x + 80) & \\
5(x + 10) + 10 & \\
5(x + 20) - 20 &
\end{align*}
\]

Ans. ______________________  
(4 marks)

6. a) Dylan spends \( \frac{2}{5} \) of his pocket money on chocolates, \( \frac{11}{30} \) on football 
stickers and saves the rest. What fraction of his money does he save? 

Ans. ________

b) A mobile phone costs ₦156. During a sale, the price of the mobile phone 
went down by 25%. What is the sale price of the mobile phone? 

€ __________  
(6 marks)
7.

Fill in:

a) The point \( A \) has coordinates (____, ____).

b) Plot and label point \( B \) (1, 2) on the grid above.

c) The points \( A, B, C \) and \( D \) form a square. Complete the square. Label point \( C \).

d) The coordinates of point \( C \) are (____, ____).

(6 marks)
8.  a) This is the plan of an adventure park.

Fill in:

(i) Scary Hut is due East of the __________________________.

(ii) The Mountain Shoot is due ____________ of the Scary Hut.

(iii) The three figure bearing of the Scary Hut from the Garden

is __________(045°, 060°, 090°).

(iv) The three figure bearing of the Rocket Ride from the Octopus Pool

is __________ (045°, 135°, 270°).
b) Triangle ABC is an isosceles triangle.

(i) Find the size of the angles marked with letters $x$, $y$ and $z$.

(ii) Fill in: $w + w = \boxed{110}^\circ$. Work out the value of $w$. 

$w = \boxed{55}$

(11 marks)
9. a)  (i) The tank in the diagram contains ______ millilitres of oil.

(ii) The oil is poured into a bottle and into a can in the ratio 3 : 4.

How many millilitres of oil are there in the bottle? ________ ml

Write down the ratio of the cost of the handbag to Katia’s savings.
Write your answer in its simplest form.

\[
\text{cost of handbag} : \text{savings} \\
\begin{align*}
\text{ } : \\
\text{ } : \\
\text{Ans. } : \\
\end{align*}
\]

(5 marks)

10. This is a pattern made using sticks.

\[
\begin{array}{cccc}
\text{Pattern 1} & \text{Pattern 2} & \text{Pattern 3} & \text{Pattern 4} \\
\hline
\text{Number of sticks} & 3 & & \\
\end{array}
\]

a) Draw the 4th pattern.

b) Complete the table below:

<table>
<thead>
<tr>
<th>Pattern Number</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>8</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of sticks</td>
<td>3</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(6 marks)
11. a) Translate rectangle A, 6 right and 4 down. Label it C.

b) Rotate rectangle A through $90^\circ$ clockwise about O. Label it D.

c) Describe the transformation that maps A to B.

____________________________________________________________________

d) Describe the transformation that maps C to B.

____________________________________________________________________

(8 marks)

12. a) Use ruler and compasses only to construct triangle PQR.

b) Measure side RQ and angle Q.

RQ = ________ cm  \hspace{1cm} \text{angle Q} = ________°.

(5 marks)
13. Robert made a survey on the favourite bands of 40 students.

The bar chart represents some of his data.

![Bar Chart]

a) Complete the frequency table below, showing the results obtained by Robert.

<table>
<thead>
<tr>
<th>Band</th>
<th>Blue Beans</th>
<th>D Dadas</th>
<th>Cold Ice</th>
<th>Fontanas</th>
<th>Others</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frequency</td>
<td>3</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>40</td>
</tr>
</tbody>
</table>

b) Complete the bar chart for Others.

c) What **fraction** of the students who took part in the survey chose **Blue Beans**? Give your answer in its simplest form.

Ans. __________

d) What is the **probability** that a student chooses **Fontanas** as her favourite band?

Ans. __________

(6 marks)

**END OF PAPER**
