

Annual Examinations for Secondary Schools 2014

FORM 3 (3rd Year) GRAPHICAL COMMUNICATION MARKING SCHEME

Orthographic View

Question No. 1 (a) End View

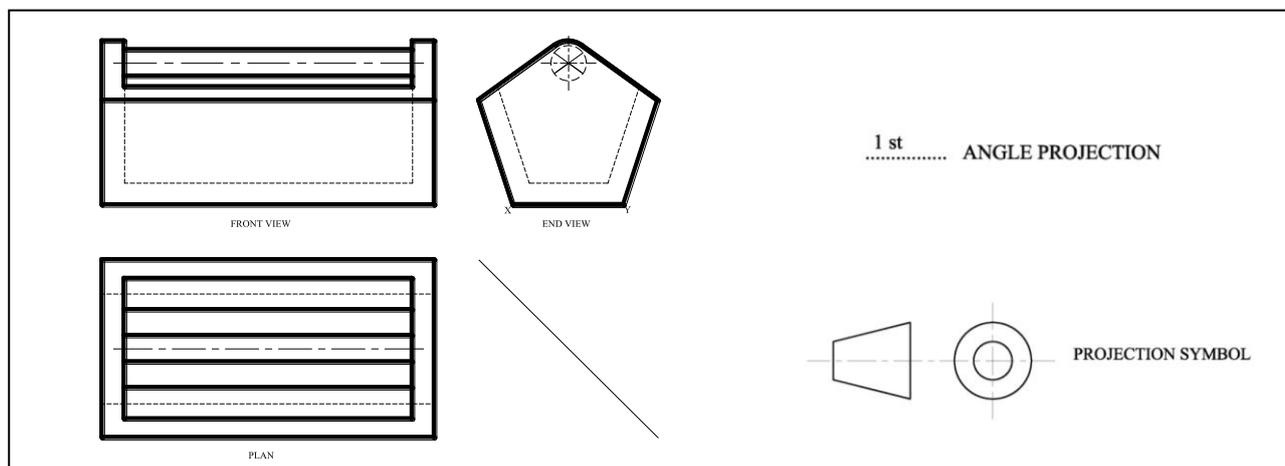

constructing / drawing a regular pentagon on given base XY	3	
constructing the R10 radiused corner	1	
drawing the hidden lines of the cylindrical handle	1	
drawing the hidden lines of the material thickness	1	
drawing centre line / neatness / accuracy	1	
Total marks for question No. 1 (a)		7

Question No. 1 (b) Plan View

projecting the necessary construction lines from the End and Plan views	1	
drawing rectangle 150mm X 81mm	1	
drawing / projecting the inner rectangle to denote material thickness	1	
drawing the cylindrical handle	1	
drawing the visible base	1	
drawing the hidden base	1	
drawing centre line / neatness / accuracy	1	
Total marks for question No. 1 (b)		7

Questions No. 1 (c), (d) and (e) Projection Symbol / Scale / Rendering

c) stating and printing the correct projection angle (1 st angle projection)	1	
d) 1 st angle projection symbol	2	
e) rendering the toolbox	3	
Total marks for questions No. 1 (c), (d) and (e)		6
Total marks for question No. 1		20

Question No. 2

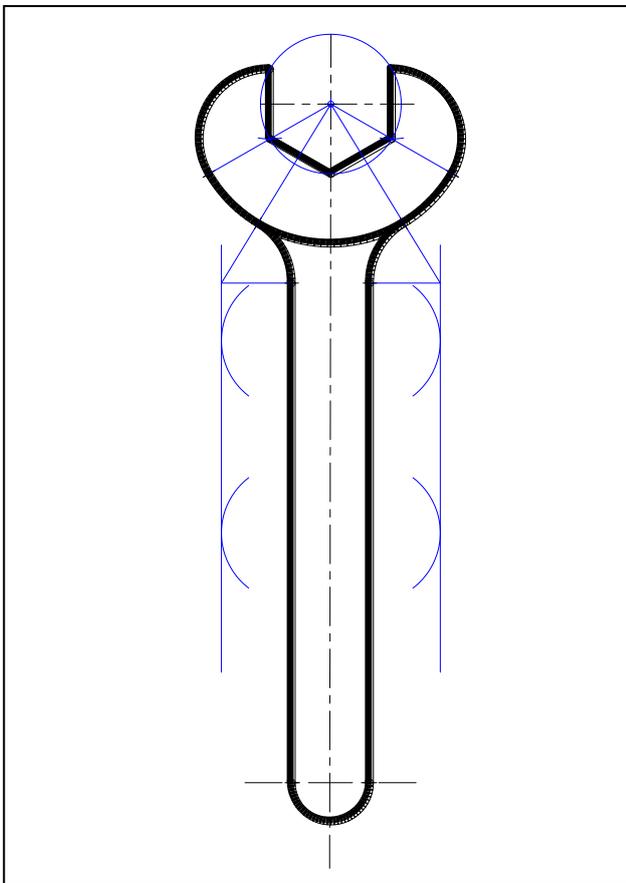

Tangential Arcs

constructing the hexagon on the given centre lines	4	
drawing the R12 semi-circle	1	
drawing two parallel lines tangential with the R12 semi-circle	1	
drawing the R40 arc	1	
locating the centres and drawing the R20 arcs touching the corners of the hexagon and tangential with the R40 arc	3	
locating centres and drawing the R20 arcs tangential with lines and the R40 arc	3	
presentation / neatness and accuracy	2	
Total marks for question No. 2		15

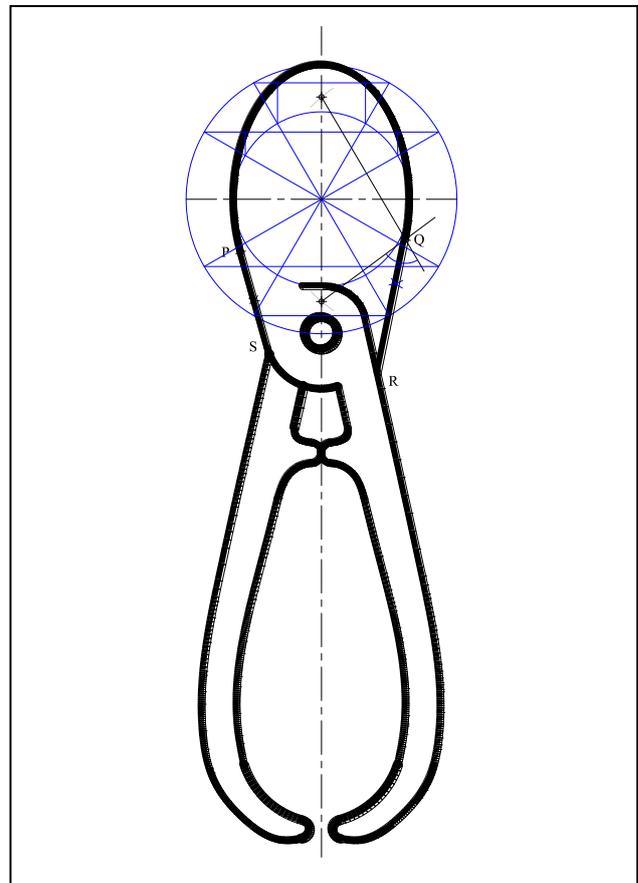

Question No. 3

Ellipse

constructing ellipse having a major axis of 80mm and minor axis 52mm	7	
locating the focal points	1	
constructing tangent at point Q	3	
joining line PS	1	
colouring the handles	2	
neatness and accuracy	1	
Total marks for question No. 3		15

Question 2

Question 3

Question No. 4

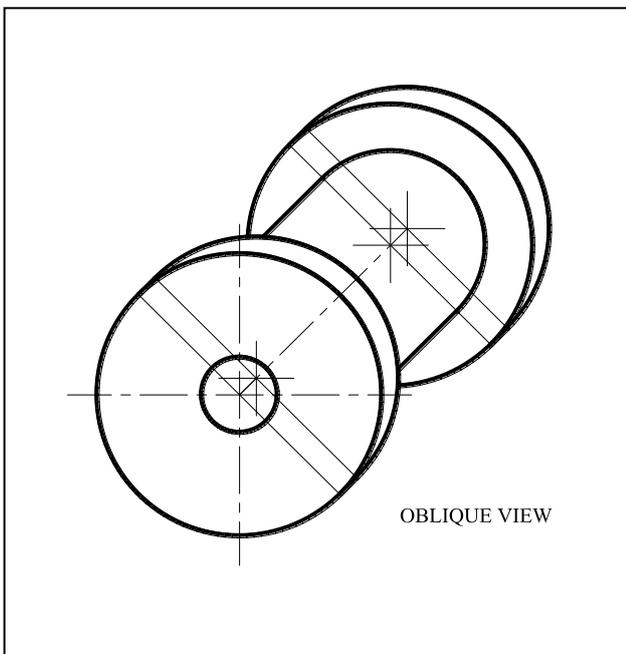

Oblique

drawing the R30 front circle on the given centre lines	2	
drawing the R10 front circle on the given centre lines	2	
drawing the 45° axis	1	
locating centres and drawing the three other R30 part-circles	3	
locating centre and drawing the R20 semi-circle	2	
drawing the 45° lines to complete the drawing	1	
neatness and presentation	1	
Total marks for question No. 4		12

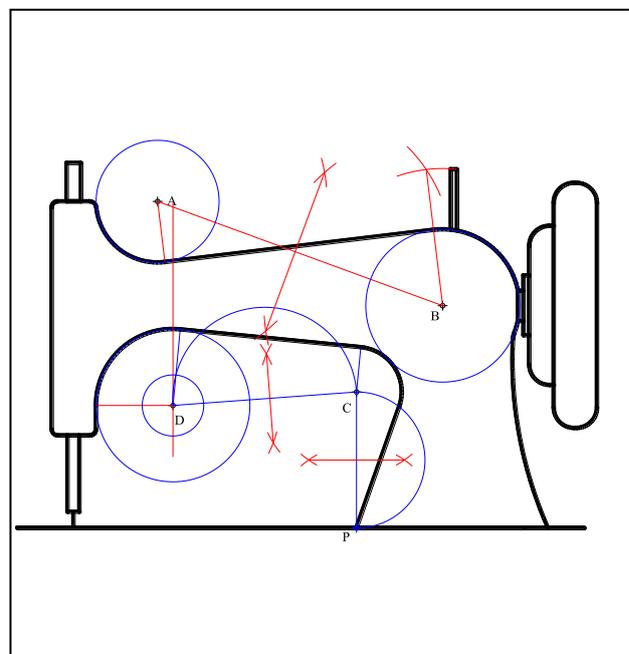

Question No. 5

Tangents

drawing the R20 circle	1	
drawing the R25 circle	1	
drawing the R15 circle	1	
drawing the R25 circle	1	
constructing tangent between the R20 and R25 circles	3	
constructing tangent between the R15 and R25 circles	3	
constructing tangent between point P and the R15 circle	3	
presentation / neatness	1	
Total marks for question No. 5		14

Question 4

Question 5

Question No. 6

Mandatory Sign

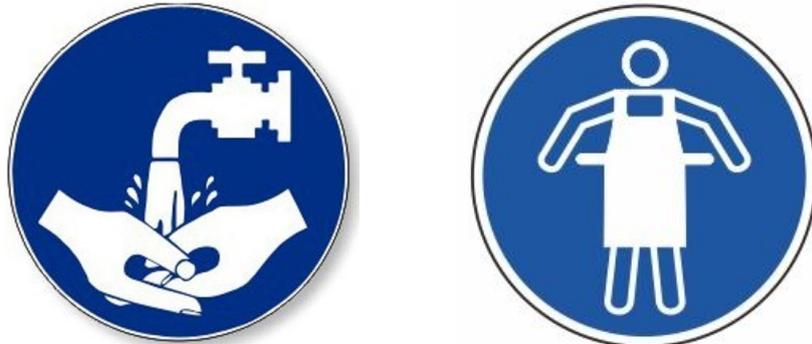

drawing the preparatory sketches	2	
drawing the final realization of the mandatory sign	5	
colouring the sign as per standard regulations using blue colour	2	
neatness and presentation	1	
Total marks for question No. 6		10

Question No. 7

Surface Development

dividing the circular plan into a number of equal parts	1	
projecting the divisions to the front elevation	1	
converging the generators to the apex	1	
projecting intersecting points to the plan view	1	
locating the intersecting points in the plan	1	
lining in the plan with a smooth curve	1	
using the appropriate construction to determine the true lengths	1	
drawing a minor sector to form the surface development	1	
stepping off arcs to determine the circumference of the circle	1	
drawing radials converging to point A	1	
transferring the true lengths from the front to the surface development	2	
lining in with a smooth curve	1	
neatness and accuracy	1	
Total marks for question No. 7		14

Question 6

Question 7
