

# SCIENCE YEAR 7 (CCP)

## Learning Outcomes – **Qualitative Feedback**

### **SCI CCP LOF 7.1 Unit: Doing Science**

- I can recall examples of science in everyday life.
- I can identify simple lab equipment and use it following safety rules
- I can carry out simple experiments and apply the idea of a fair test.
- I can identify the main parts of the Bunsen burner and use it safely.

### **SCI CCP LOF 7.2 Unit: Exploring Nature**

- I can identify a variety of living things and sort them into groups including vertebrates and invertebrates.
- I can link some characteristics of plants and animals to their habitats.
- I can identify different feeding relationships.
- I can explore local habitats and observe some living organisms.

### **SCI CCP LOF 7.3 Unit: Chemical Matters**

- I can sort objects in solids, liquids and gases.
- I can see changes in states of matter.
- I can identify some properties of acids and alkalis.
- I can use indicators to identify acids, alkalis or neutral solutions.

### **SCI CCP LOF 7.4 Unit: Earth and Space**

- I can describe the movements of the Earth, Sun, and Moon, and explain day, night, and the seasons.
- I can name some planets and explain that they orbit the Sun in the Solar System.
- I can recall that gravity is a force that keeps things in orbit.
- I can appreciate how space exploration can be useful in everyday life.

## SCI CCP LOF 7.5 Unit: Cells and Reproduction

- I can use a magnifying lens or a light microscope to observe small things.
  - I can identify the correct position of the main organs on the human torso.
  - I can identify the male and female reproductive organs and label some parts.
  - I can describe pregnancy and identify some examples of good and bad practices for a pregnant woman.
-
